**TURBOFIL TO INTRODUCE LINE OF TABLETOP MONOBLOCKS AT
PACKEXPO**

JULY 5, 2005, NEW YORK, NY – TurboFil Packaging Machines, LLC announced that it will introduce its line of Tabletop Monoblocks at PackExpo in Las Vegas on September 27, 2005. These extraordinary little machines use the same proven technology seen in TurboFil's full sized Monoblocks but in an even more compact design.

The Tabletop Monoblock is designed to automatically fill and close small bottles or vials in a variety of formats. It offers a flexible choice of dosing pumps with a servo-controlled option. The availability of multiple functions on minimal floor space makes it ideal for clean room and other tight spaces. It is suitable for sterile or non-sterile products in the pharmaceutical, cosmetic, diagnostic or chemical industries. "We designed this machine to address the need for a more flexible and cost effective solution for small scale filling and assembly", reports Eli Uriel, Founder and General Manager of TurboFil.

TurboFil Packaging Machines, LLC is a privately held manufacturer of liquid filling and assembly machines. The company produces products including indexing monoblocks, benchtop fillers, crimpers and cappers for the pharmaceutical, cosmetic and chemical industries.
