COMPACT TRAY FILLING MACHINE FOR CLEAN ROOM APPLICATIONS

JULY 5, 2005, NEW YORK, NY – TurboFil Packaging Machines, LLC introduced a new benchtop tray filler for clean room applications (TF-50). This compact instrument can operate at speeds of up to 40 to 50 bottles per minute depending on product properties, making it an ideal choice where there is a need for filling of small to intermediate sized batches. It is a most cost effective solution for clean room filling. This compact filler has a footprint of 34 “ by 29” and is simple enough to be appropriate for unsupervised repetition filling.

“We designed this filler to meet the special needs of start-up or small pharmaceutical manufacturers,” said Founder and General Manager, Eli Uriel. “We believe this will prove to be a cost effective and efficient option for these companies.”

TurboFil Packaging Machines, LLC is a privately held manufacturer of liquid filling and assembly machines. The company produces products including indexing monoblocks, benchtop fillers, crimpers and cappers for the pharmaceutical, cosmetic and chemical industries.
