**TURBOFIL'S UNIPUCK™ ADJUSTABLE PUCK FILLING SYSTEM RELIEVES
CHANGEOVER HEADACHES**

MAY 11, 2006, BRONX, NY – TurboFil Packaging Machines, LLC has recently shipped its UniPuck™ Adjustable Puck Filling System to Hawkнад Manufacturing Industries. The UniPuck™ System's breakthrough patent pending design makes it the most flexible filling and closing system available today.

This system uses a closed loop tabletop chain conveyor to move adjustable carrier pucks through a series of workstations to fill and close bottles. Key benefits include:

- **Quickly adjust pucks** for almost any shape and size bottles means no change parts needed
- **No need to adjust guide rails** allows for rapid changeover between bottles
- **No need to adjust space between nozzles**
- Even **unstable bottles** are easily filled, crimped and capped
- Pucks are quickly and **easily adjustable** with electric hand screwdriver
- **Large range** of bottle, vial or jar sizes
- Perfect for large or small runs

**Key Features of TurboFil's
UniPuck™ System**

- No need for different pucks for each different bottle
- One system can accommodate multiple filling systems
- Container types: glass or plastic
- Closure types: screw cap, crimped cap or snap cap
- Speed range: Up to 60 per minute
- Servo controlled diving nozzle system
- Filler options include piston, vacuum, gravity, pressure, peristaltic
- Pre-stored recipe menus easily selected via touch screen

General Manager of TurboFil, Eli Uriel explains, "We saw the need for a system that is very flexible and allows for easy changeovers. This is especially important for contract fillers who need to respond quickly to their customers' requests to accommodate unique packaging. It also simplifies the operations process for fillers that have short runs."

Charles Dankwah, President of Hawkнад Industries saw the possibilities. "We were running a manual line. We wanted to automate but we didn't want to have to spend a lot of time on changeovers between products. The UniPuck™ system has turned out to be a cost effective and very easy to run solution for us. We are pleased with the results."

TurboFil will be offering a press briefing about the UniPuck™ system at EastPack (Thursday, June 8 at 10am in the Press Room) at which we will demonstrate the concept and answer questions.

Hawknad Manufacturing Industries, Inc., was founded by a group of Chemical Engineers in 1990 to fill the void created by the lack of specially formulated cosmetic products that address ethnic skin care problems. Their Clear-N-Smooth product line has now been expanded to cater for all skin types. The products are considered "cosmeceuticals"; they moisturize and smooth out rough-and-dry skin and contain active ingredients that solve some common skin care problems.
